## Chapter 1 Deployment Resource

Testing Material Name	Instruction
BBC installation package	<p>BBC installation package download address: BBC2.5.0_20180630.ova: <a href="https://drive.google.com/open?id=1oKNxq8r12nSwHLbXzKvDznZBNH3ldR">https://drive.google.com/open?id=1oKNxq8r12nSwHLbXzKvDznZBNH3ldR</a></p> <p>BBC2.5.1EN(20180918).pkg: <a href="https://drive.google.com/open?id=1wxnmMgk8ChgCaGtQ7yRG0Z04dxJp2eGd">https://drive.google.com/open?id=1wxnmMgk8ChgCaGtQ7yRG0Z04dxJp2eGd</a></p> <p>BBC2.5.2_B(20181108-151614).pkg: <a href="https://drive.google.com/open?id=1_66bbPMILp_jGGSFvGCJmZYFK1kuq_20">https://drive.google.com/open?id=1_66bbPMILp_jGGSFvGCJmZYFK1kuq_20</a></p> <p>Note: BBC2.5.0_20180630.ova is a Chinese version BBC, You need to execute one command in the BBC backend to convert to the English version.</p>
BBC Sofeware platform	Ova Virtualization Deployment (Vmware, Sangfor aCloud)
License Key	Currently, the test serial number authorization can only be applied through China domestic mobile number. If the local office requires test, you could seek for China local office personnel or CTI personnel to assist on the application.

---

## Chapter2 BBC Deployment Instruction

### 2.1 BBC environment deployment

BBC Center device only supports single-arm deployment.

Connect the LAN port to the internal network core switch.

Port mapping is required on the front gateway device to map the TCP/UDP port 5000.

BBC only supports single-arm deployment, but there are two supported modes:

1. Ova Virtualization Deployment (Vmware, Sangfor aCloud )
2. Hardware BBC device

**Note:Recommended ova mode deployment**

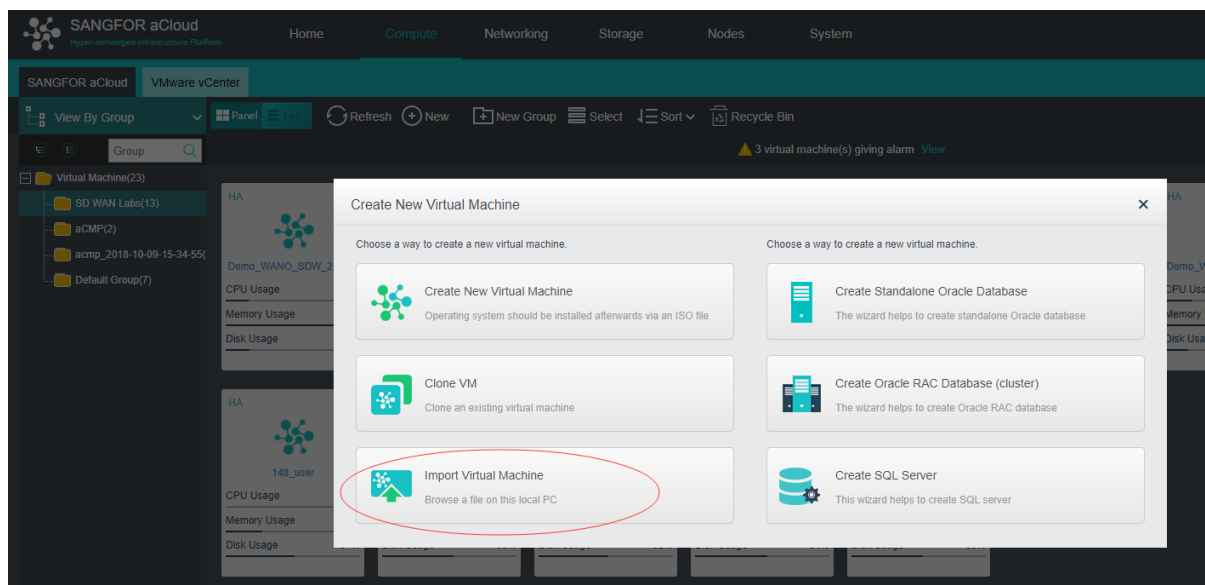

BBC deployment reference specification as follows:

Specification Type	CPU	Memory	System Hard Disk	Data Hard Disk
Testing Lowest Specifications	8 Core	8G	240G	500G
Testing Recommended Specifications	8 Core	16G	240G	500G
Enterprise Recommended Specifications	8 Core	32G	240G	500G

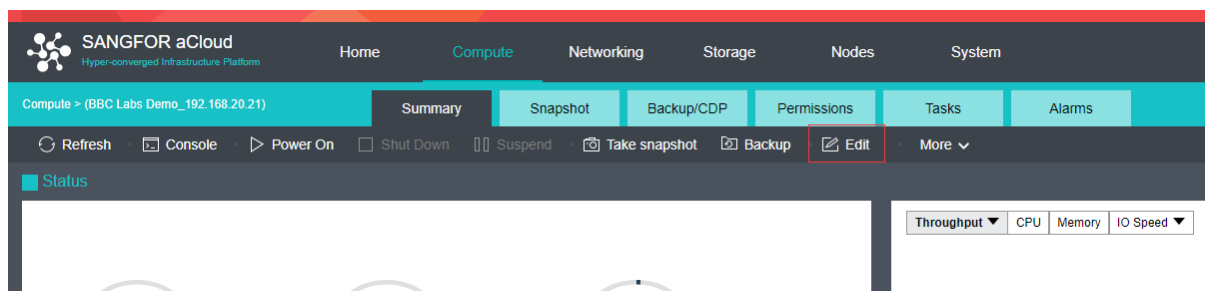

## 2.2 Deployment steps

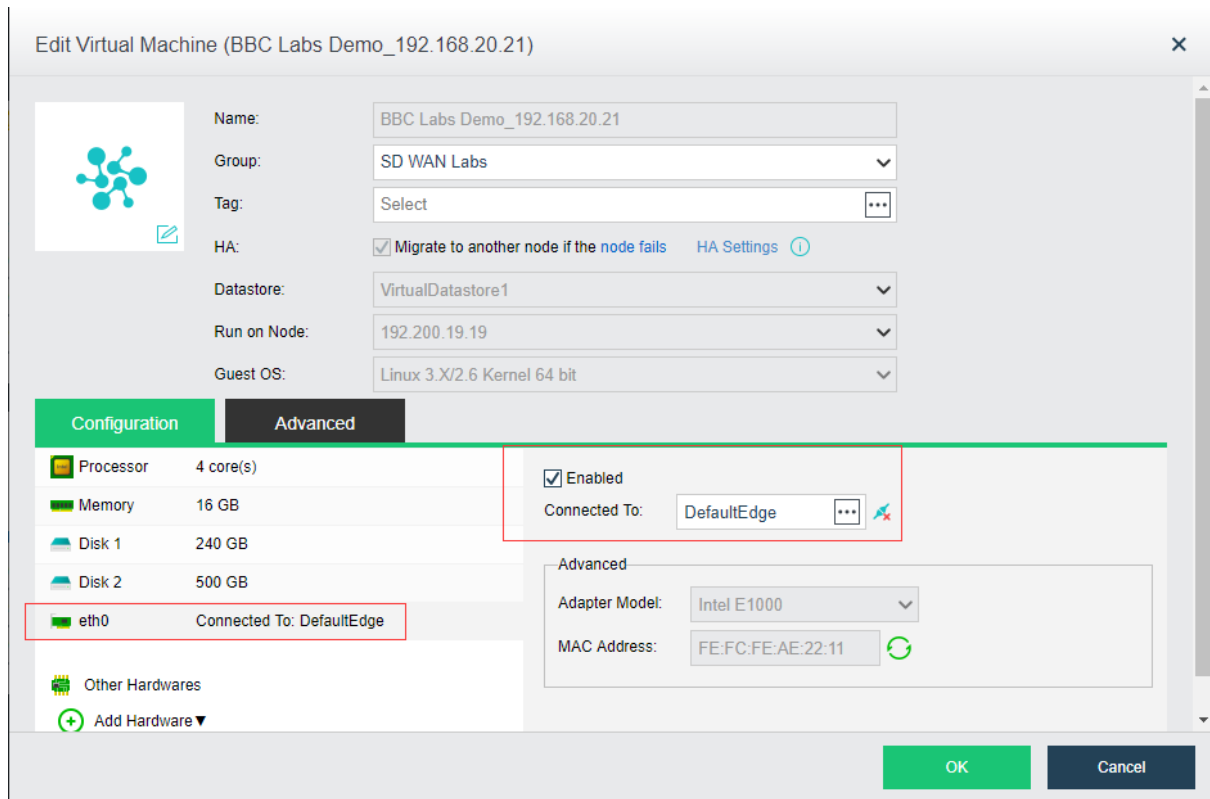

1. Import BBC2.5.0\_20180630.ova image into aCloud or Vmware, and then configure an IP address for the BBC (Notes: This BBC is a Chinese version)

The following picture shows the location of the aCloud import BBC ova image. Import operations can be done according to the aCloud wizard prompts

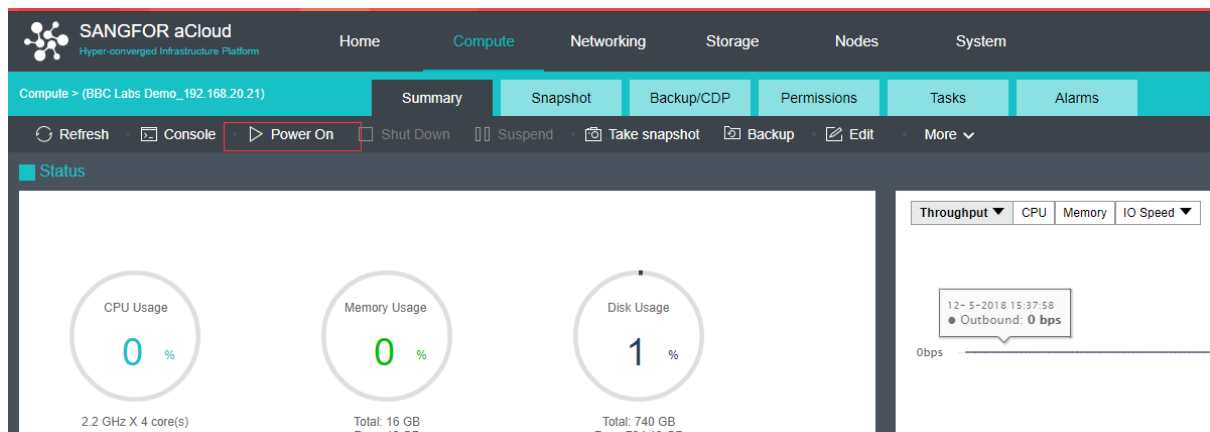

After the BBC is imported into aCloud, you need to link the first NIC of the BBC to the virtual network.

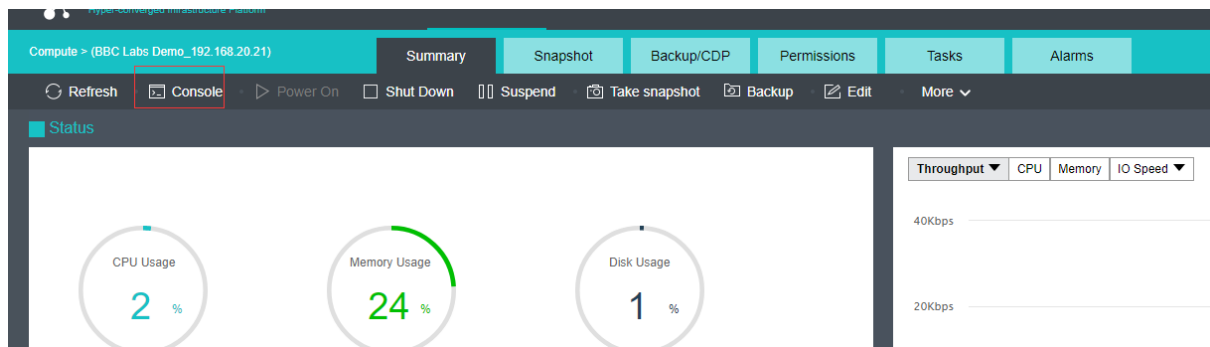

You need to power on the BBC at last:

Then, You need to login to the BBC background to configure the BBC LAN port IP address. The steps are as follows:

- (1) Click **Console** on the BBC virtual machine management interface to enter the BBC background interface, as shown below :

(2) Log in with the following account: root/aminsangfornetwork

```

Welcome to the SANGFOR BBC
https://10.250.0.7

host-fefcfe704a2e login: root
Password:
Sangfor :aSV/host-fefcfe704a2e /sf #
Sangfor :aSV/host-fefcfe704a2e /sf #
Sangfor :aSV/host-fefcfe704a2e /sf #

```

(3) Using the command of ifconfig to configure the BBC LAN port IP according to your plan. We configure the BBCLAN port IP as 192.168.20.21 in this case:

Command1: ifconfig eth0 192.168.20.21 netmask 255.255.255.0

Command2: route add default gw 192.168.20.1

```

Welcome to the SANGFOR BBC
https://10.250.0.7

host-fefcfe704a2e login: root
Password:
Sangfor :aSV/host-fefcfe704a2e /sf #
Sangfor :aSV/host-fefcfe704a2e /sf #
Sangfor :aSV/host-fefcfe704a2e /sf # ifconfig eth0 192.168.20.21 netmask 255.255.255.0
Sangfor :aSV/host-fefcfe704a2e /sf # route add default gw 192.168.20.1
Sangfor :aSV/host-fefcfe704a2e /sf #

```

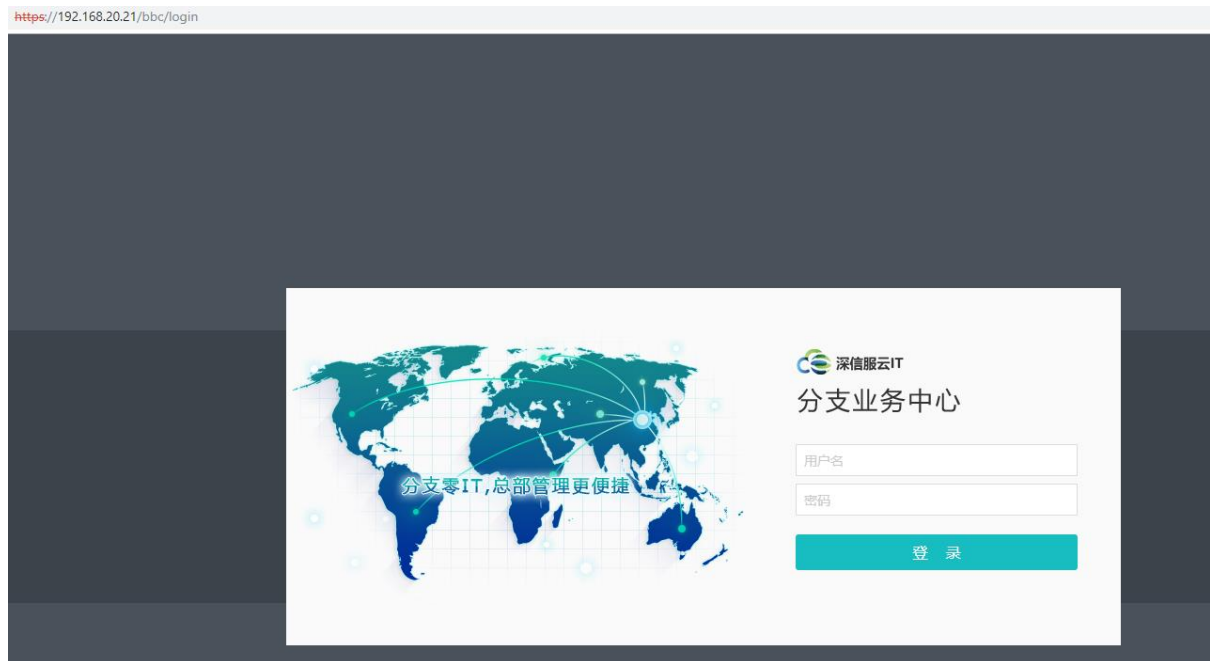

(4) Login BBC with IP 192.168.20.21.

Login address : <https://192.168.20.21>

Notes: BBC2.5.0\_20180630.ova is a Chinese version BBC, You need to upgrade the BBC to 2.5.2 and then execute one command in the BBC backend to convert to the English version

Log in with the following account: admin/admin

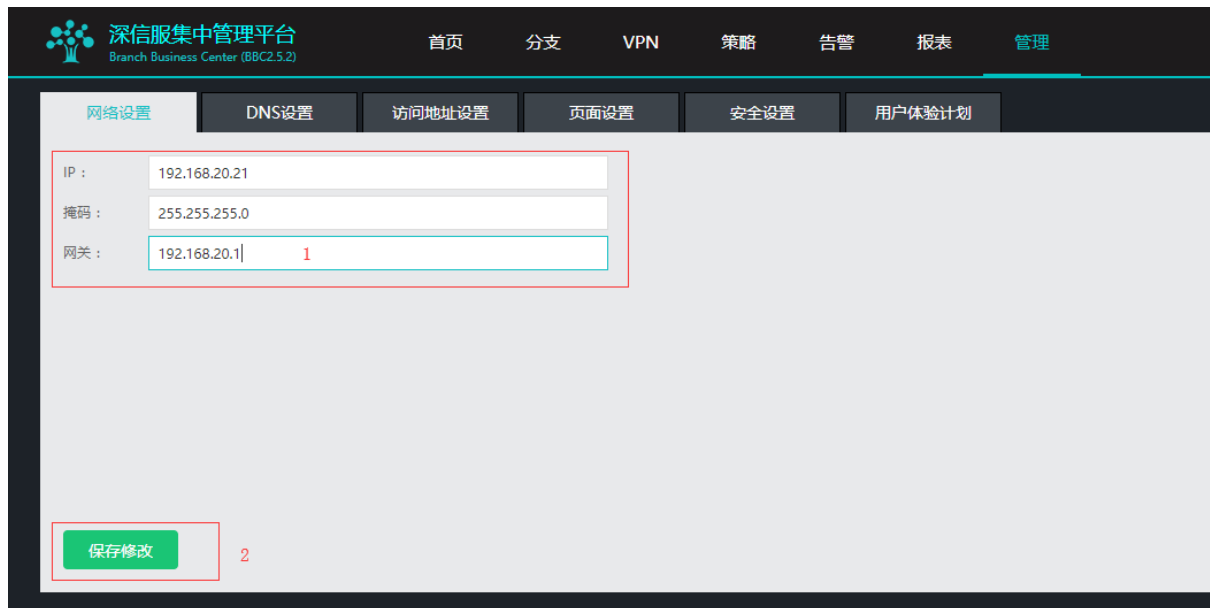

Log in to the BBC console to reconfigure the BBC LAN interface IP address :

Step:

(1) The console page jumps to the network configuration page as shown below :

(2) Reconfigure the LAN interface IP address:

2. Upgrade the BBC.2.5.0 to BBC 2.5.2\_EN

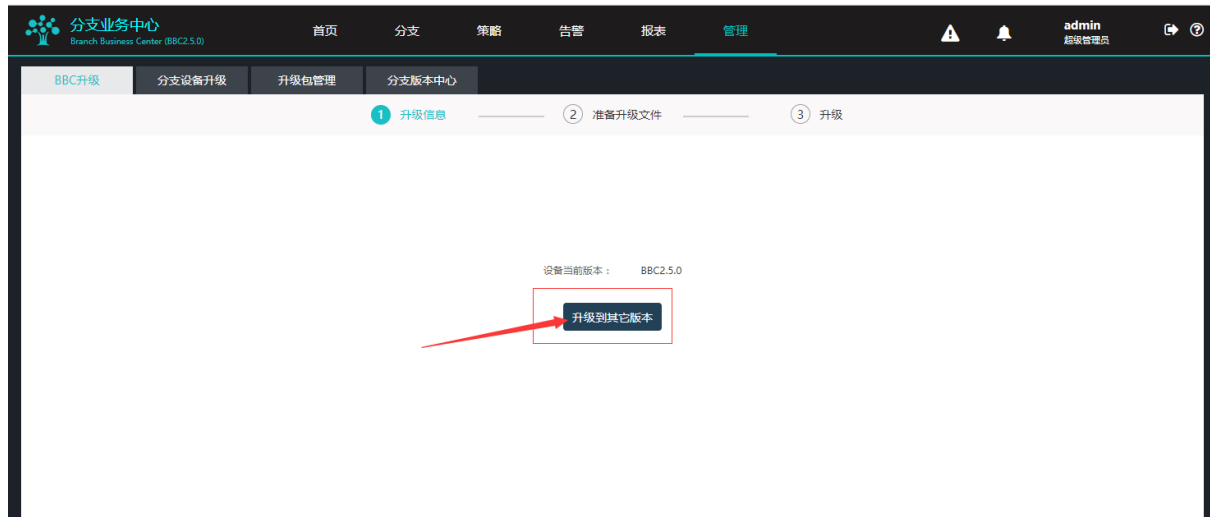

BBC2.5.2\_B(20181108-151614).pkg:

[https://drive.google.com/open?id=1\\_66bbPMILp\\_jGGSFvGCJmZYFK1kuq\\_20](https://drive.google.com/open?id=1_66bbPMILp_jGGSFvGCJmZYFK1kuq_20)

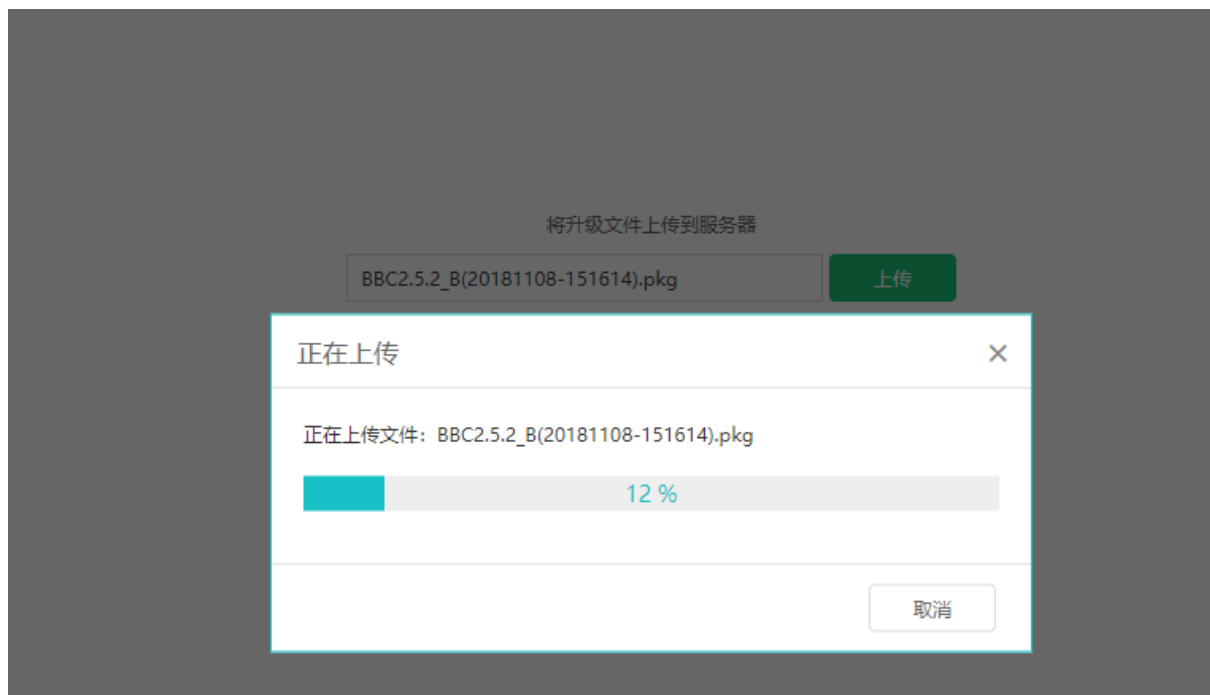

Path : 【管理】 -- 【设备升级】

Click the button shown below to load the upgrade package and upgrade to BBC2.5.2.

Upload the upgrade package:

After uploading the upgrade package, click the button below to start the upgrade :

将升级文件上传到服务器

BBC2.5.2\_B(20181108-151614).pkg

上传

升级包版本: BBC2.5.2\_B 2018-11-08 15:16:14

立即升级

取消

After the upgrade is complete, click the button below to restart the BBC device :

升级完毕，需要重启物理主机才会生效!

100 %

立即重启

取消

- Log in to the BBC background and execute the following command to convert the BBC to English version.

Command1: `switch_i18n.py en_US`

Command2: `reboot`

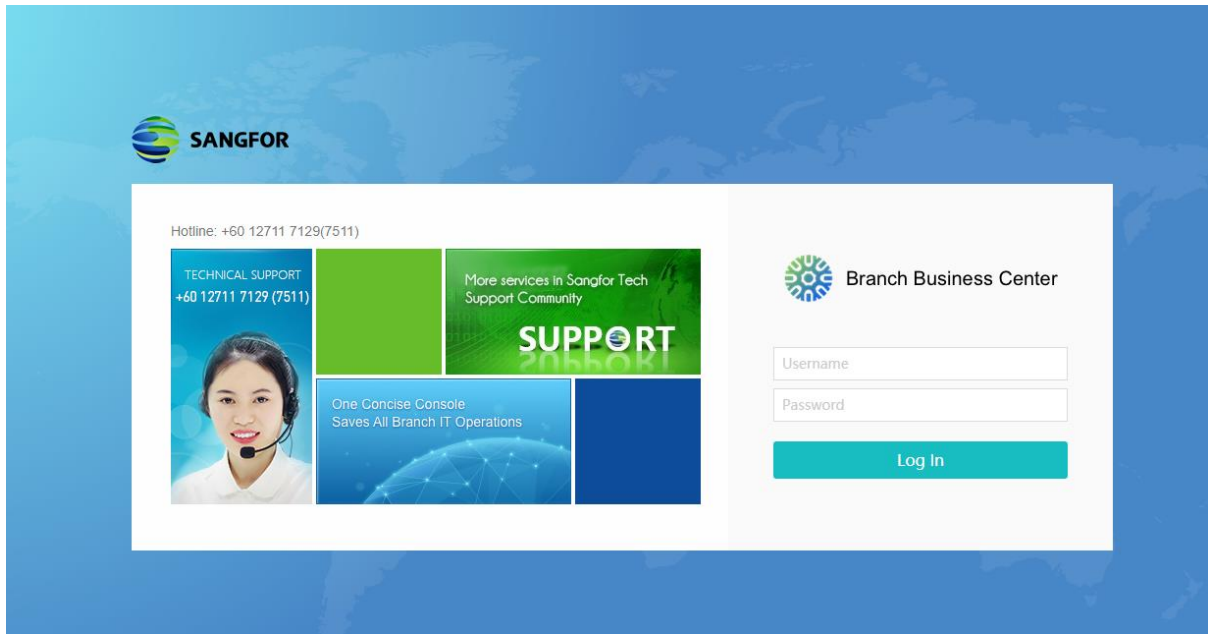

```
Sangfor:aSV/host-fefcfe704a2e /sf # switch_i18n.py en_US
Switch to English [en_US] environment
i18n will be ok after reboot
Sangfor:aSV/host-fefcfe704a2e /sf #
```

```
i18n will be ok after reboot
Sangfor:aSV/host-fefcfe704a2e /sf # reboot
[ 1799.685194] [watch_reboot]: get reboot(1) at 4295342218....

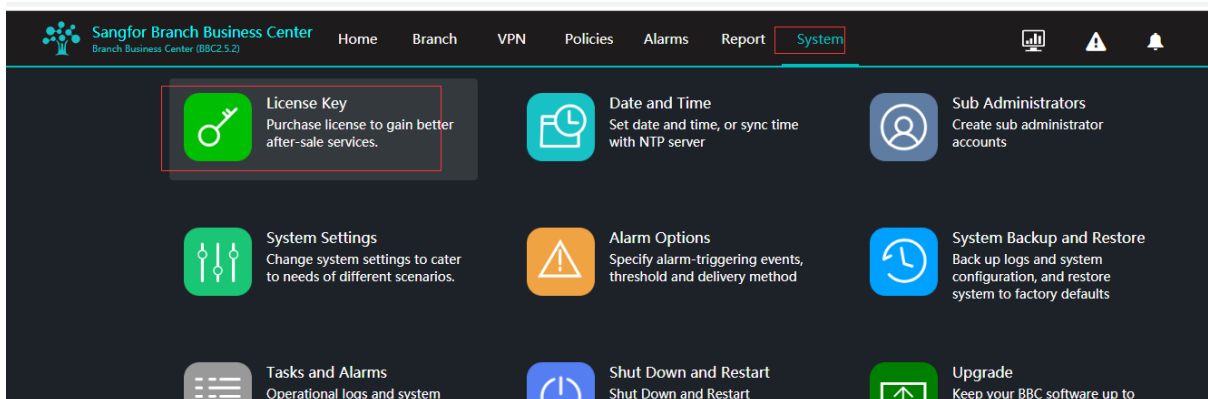

Message from syslogd@host-fefcfe704a2e at Dec  5 19:42:33 ...
kernel:[ 1799.685194] [watch_reboot]: get reboot(1) at 4295342218....

The system is going down for reboot NOW!04a2e (tty1) (Wed Dec  5 19:42:33 201
INIT: Switching to runlevel: 6
INIT: Sending processes the TERM signal
[ ok ] Stopping cron: : OK!
[....] Stopping sdog: : OK!_
```

After restarting, BBC becomes English version:

4. License Key: Currently, the test serial number authorization can only be applied through China domestic mobile number. If the local office requires test, you could seek for China local office personnel or CTI personnel to assist on the application.

5. Dnat: Port mapping is required on the front gateway device to map the TCP/UDP port 5000
