## **1 Overview**

### **1.1 Major Features**

#### **1.1.1 New Features**

#### **Target Customers**

Customers who bought Sangfor Endpoint Secure or have high requirements for antivirus capabilities.

#### **Major Values**

1. The Bitdefender engine is used to improve antivirus capabilities, virus detection rate, and fix rate.

2. The memory usage during off-peak hours is further optimized to improve user experience.

3. Multiple agent deployment methods (i.e., agent installer download and others) are provided to improve user experience.

4. Remote support is provided to address the issue of unattended hosts.

5. Management of Mac endpoints is newly added, which supports virus scans and endpoint management.

6. Licensing optimization: Licensing methods are simplified, and the licensing process is optimized so that users can flexibly allocate and manage license resources.

7. WebShell optimization: The wsk 3.0 engine is adopted to improve detection capabilities and the detection supports customized web directories.

8. Special virus scans for Linux endpoints: It supports the detection and fix of crypto mining viruses, improving antivirus capabilities.

9. RDP Secondary Authentication: It supports secondary authentication of trusting files for Windows endpoints and the use of default passwords as secondary authentication passwords, which greatly improves anti-ransomware capabilities.

#### 1.1.2 Others

1. After the upgrade, integration with Sangfor Platform-X will be unavailable. Contact a Sangfor technical support representative for service packs if necessary.

2. The **Script File** feature under the **Remote Access** module will be unavailable.

3. The method of deploying and installing agents has changed. Agents can only be downloaded in **System** > **Agent Deployment** now.

#### **1.1.3 Integration with Third-Party Products**

None.

### **1.2 Upgrade Impacts**

After the update, services will be restarted. There is no need to restart devices.

#### **1.2.1 Impacts on Services**

During the upgrade process, events detected on the Endpoint Secure agent cannot be reported to Endpoint Secure Manager.

#### 1.2.2 Impacts on O&M

Endpoint Secure Manager cannot be logged in for 10 minutes.

#### **1.2.3 Impacts on Customer Network**

The upgrade of Endpoint Secure Manager may take 10 minutes. The upgrade time of Endpoint Secure agents depends on the number of agents. (Notes: The maximum bandwidth of downloading agents is 2 MB/s, and the maximum number of agents in a download task is 5. It will take 5 minutes to download 5 agents under stable network conditions.)

#### **1.2.4 Other Impacts**

None.

### **1.3 Customer Upgrade Preparations**

#### **1.3.1 Upgrade Preparations**

The Endpoint Secure Manager is to be upgraded.

#### 1.3.2 Notes

The upgrade of Endpoint Secure Manager may take 10 minutes. The upgrade time of Endpoint Secure agents depends on the number of agents. (Notes: The maximum bandwidth of downloading agents is 2 MB/s, and the maximum number of agents in a download task is 5. It will take 5 minutes to download 5 agents under stable network conditions.)

#### **1.4 Implementation Procedure**

#### **Offline Update:**

Step 1. Click Import Update Package / SP in System > System Updates >
Manager and Agent to import an update package.

**Step 2.** Perform the update.

The update will be complete in 10 minutes.

### **1.5 Post-Upgrade Service Check**

1. Endpoint Secure Manager can be logged in to.

2. Virus scan tasks sent can be completed.

### **1.6 Rollback Instructions**

Rollback: Not supported.

(Contact a Sangfor technical support representative if the upgrade failed) Rollback is not supported. You can contact a Sangfor technical support representative to recover the Manager from backups. Upgrade Guide

### **1.7 Preparations for Upgrade**

#### 1.7.1 Upgrade Tools

EDR3.5.5EN update package: ES3.5.10EN\_20220106.pkg

#### **1.7.2 Environment Information**

The update requires the IP address, username, and password of the Manager to be updated.

#### **1.7.3 Customer Resource Coordination**

The upgrade takes about 10 minutes.

If the upgrade fails, a server background account and password are needed.

### **1.8 Pre-Upgrade Check**

Check whether the current version can be upgraded.

Current Version	Upgrade Path	Notes
3.2.15EN	3.2.15EN>3.2.22EN> ES3.5.10EN 20220106.pkg	3.2.15EN cannot be directly updated to 3.5.10EN. It must be updated to 3.2.22EN first.
		3.2.22EN, 3.5.1EN, and 3.5.5EN can be updated to 3.5.5EN.

#### 1.9 Notes

#### • Upgrade Limitations

The size of free disk space must be more than three times the size of the upgrade package.

#### • Immediate Upgrade of Configurations, Logs, and Data

Yes.

#### • Upgrade Recommendations

- 1. During the update, do not restart the device manually and keep the device powered on.
- If any error message pops up during the update, please do not perform any operations and call us at +6012-7117129 (7511) immediately. Do not manually restart the device.

#### • Impacts of Central Management (CM) on Cluster

None.

• Pass-Through Supported

Not supported.

• High Availability Supported

Not supported.

### **1.10 Upgrade Procedure**

#### 1.10.1 Upgrade Path

Upgrade path:

An update may take 15 minutes. Please perform the update during off-peak hours.

Current Version	Upgrade Path	Notes
3.2.15EN	3.2.15EN > 3.2.22EN > ES3.5.10EN 20220106.pkg	3.2.15EN cannot be directly updated to 3.5.10EN. It must be updated to 3.2.22EN first.
3.Z.ZZEIN~3.5.5EIN		3.2.22EN, 3.5.1EN, and 3.5.5EN can be updated to 3.5.5EN.

Upgrade of custom versions is not supported.

#### 1.10.2 Upgrade Procedure

Step 1. Click Import Update Package / SP in System > Update > Manager
and Agent to import an update package.

Step 2. Perform the update.

The update will be complete in 10 minutes.

### 1.11 Post-Upgrade Check

#### **1.11.1 Checking the Platform**

Log in to the Manager and check whether the current version is 3.5.10EN in **System > System Updates > Manager and Agent**.

#### 1.11.2 Checking Service Status

Check if the virus task sent can be completed. If yes, basic functions work properly.

#### **1.12 Troubleshooting Upgrade Failures**

Solution 1: Contact a Sangfor technical support representative for troubleshooting.

Solution 2: If the upgrade fails, you can enter the background of Endpoint Secure Manager, enter the command /sf/edr/manager/bin/eps\_services restart, and upgrade the manager again.

#### **1.13 Rollback Instructions**

Rollback: Not supported.

#### (Contact a Sangfor technical support representative if the upgrade failed)

Rollback is not supported. You can contact a Sangfor technical support representative to recover the Manager from backups.
